

BUSINESS ADVANTAGES

Derive Business Values Faster & Efficiently

Jumbune helps businesses to rapidly realize values from Big Data.

With Enterprises pressing to engage every bit of business relevant data to Data Lakes for analytics like Customer 360, Customer Journey Analytics, Sentiment Analysis, both the implementation efficiency of business use cases and operational efficiency of Data Lakes holds the key of success for Big Data based platforms.

Highlighting features of directly promising better Business ROI are,

- *Charge back platform customers for resource usage*
- *Optimize Workloads for efficient execution*
- *Automate detection of Data Quality Issues*
- *Automate Data Cleansing in Data Lake Pipelines*
- *Monitor and optimize on Premise, Cloud and Hybrid clusters*

For instance, Enterprises leveraging Hadoop based analytics platform for offering AaaS, DaaS, MLaaS can charge back platform user based on resource usage or engine usage while Enterprises using Cloud Infrastructure either native or IaaS can maximize ROI by most efficiently leveraging both worker elasticity and Instance offered resources with the help Jumbune.

Jumbune is completely interoperable with your favorite existing Enterprise Hadoop distribution, Cloud and On premise infrastructure.

Infrastructure Cost Savings

Cut Analytics Development Cost

Brings Chargeback Reports

Increased Operational Efficiency

Empowers Data Scientist
